

# Ama Dablam Expedition

## Trip Overview

Ama Dablam (6,812 m) is a technical Himalayan peak, considered one of the most beautiful mountains in the world. The expedition begins from Lukla, following the classic Everest region trail through Namche, Tengboche, and Dingboche. Acclimatization hikes and high camps prepare climbers for technical climbing on snow, ice, and rock. The ascent involves rope work, crevasse navigation, and steep alpine terrain. Panoramic views of Everest, Lhotse, Nuptse, and the surrounding peaks reward climbers. The descent returns along the same trail to Lukla. This strenuous expedition is suitable for experienced climbers seeking a technical ascent with challenging but unforgettable Himalayan scenery.
