

Chulu West & Chulu East Peaks

Trip Overview

The combined Chulu West (6,419 m) and Chulu East (6,584 m) expedition follows a shared approach through the Annapurna region via Jomsom and Muktinath. High alpine camps are established for summit rotations, with non-technical climbing on Chulu West and slightly more technical ascent on Chulu East. Trekking passes through yak pastures, alpine meadows, and Tibetan-influenced villages, providing cultural immersion along the way. The summit days reward climbers with panoramic views of Annapurna, Dhaulagiri, and Mustang. Fully camping at high altitudes ensures a true Himalayan adventure experience. Suitable for moderately experienced climbers, this expedition combines trekking, alpine climbing, and cultural encounters in one comprehensive journey.

Total Trip Days: 20 DAYS

Region: Annapurna Region

Max Altitude: 6,584 m (Chulu East Summit)

Difficulty: Strenuous / Moderate Alpine (Non-Technical with some snow and mixed rock)

Trip Highlights
